WHAT ELSE IS NEW?

MyH2O & Advanced Water Meters

The new advanced digital water meters have been installed in the Bentley Village and Waterchase Estates neighborhood. When the on-line customer portal becomes available later this year, these new digital water meters will let customers monitor water usage in real-time. See the January 14th Community Engagement Bulletin about YardSmart conferences and monthly water-saving seminars.

Individual customers use approximately 158 gallons of water each day. The goal is to reduce water usage to an average of 152 gallons of water each day for each individual -- saving 1.8 billion gallons of water for the City of Fort Worth! You can expect changes in your water bill as these digital meters accurately track all of your water usage.
